

## CarClean™

### A/C Ventilation & Interior Sanitizing System

*Improve In-Car Air Quality for the well-being of drivers & their passengers*

- The perfect preventative maintenance (PM) service because it can be run on any vehicle, leased or owned that comes into your shop, regardless of year, make, model or mileage
- Restores in-vehicle air quality for a healthier driving environment
- Cleans and deodorizes the entire HVAC System
- The car's recirculation system draws the mist through the vent system and "Fogs" the entire interior of the vehicle
- Simple one button operation allows for easy service procedure
- Built in low-fluid sensor alerts and protects the machine from running dry
- Portable, Operates on 12 Volt DC

Part No. 500-0500

## Why use the CarClean System™?

Modern HVAC systems trap more moisture than in the past. This creates a habitat for mold, mildew, bacteria and other micro-organisms to grow. To maintain cabin temperatures, these efficient systems require a larger percentage of air to be recirculated causing the harmful mold spores to be regularly blown into the passenger cabin and colonize anywhere moisture collects.

Micro-organisms such as mold spores are linked with many adverse health effects ranging from breathing difficulties to nervous system disorders. Drivers and passengers are spending much more time in vehicles; the associated symptoms and illnesses include:

- breathing difficulties
- frequent headaches
- hypersensitivities
- allergic reactions
- cold symptoms
- sinus congestion
- long-term ailments

## The Perfect Preventative Maintenance Service

In today's automotive service landscape, vehicles are built better with longer service intervals. To remain profitable, shops can't rely on repairs, they have to build value through preventative maintenance (PM).

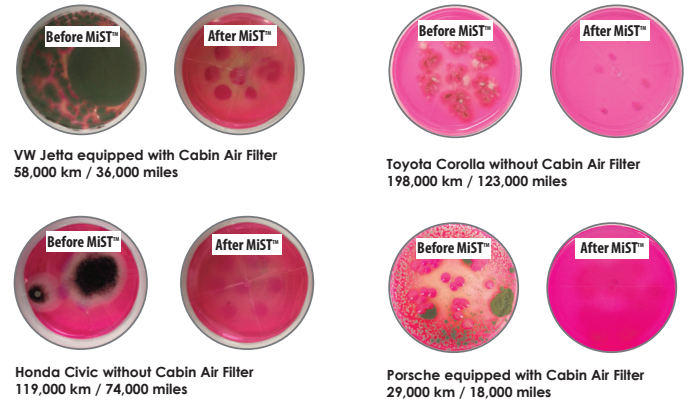

In-Car air quality is the perfect PM service because it targets the health of the driver not the vehicle. The PM service can be run on any vehicle, leased or owned that comes into your shop, regardless of the year, make, model, mileage or condition.

## How the CarClean System™ Works

The MotorVac® CarClean System™ creates micro-droplets which are drawn into the vehicle's ventilation system and travel through the recirculation intake, penetrating and treating the entire ventilation system including the evaporator, heater core, air ducts and passenger cabin surfaces.

## The Results Speak for Themselves

Below are actual samples that were taken from the vehicle's HVAC system before and then two days after a MotorVac® CarClean™ Service.

## Ultrasonic MiST™ Cleaning Solution

Ultrasonic Proprietary MiST™ Cleaning Solution improves In-Car air quality, refreshes and revitalizes the air people breathe. Penetrates deep into the car's HVAC system and eliminates odors, all in under 15 minutes.
